

Hair Analysis Testimonials

Dr. Hull's counseling expertise is based on her professional background. She has counseled numerous celebrities, professional athletes and sports figures, lawyers, and other medical practitioners, doctors and dentists. She works internationally with clients, and continues her research and development into perfecting the detoxification of toxins within the human body.

Good morning,

I got the test results yesterday. Wow, I never thought about mercury and where would the nickel come from? I really should have considered this because I have a mouthful of fillings ... My fillings started at a very early age, unfortunately. My dentist did mention that my fillings may need to be replaced, but when I asked about mercury poisoning, he blew me off and stated that none of the stuff I heard was true because of the amount used in the fillings... I have proof now thanks to the hair analysis and will get these old fillings removed by another dentist.

You're the best!

Thanks again,
J. J.

Dear Dr. J,

Thanks for all your help -- appreciate your wisdom. I have searched for the "magic" answer and know that there is no magic, but the hair analysis is the closet I've come!

I appreciate your time. And I will ask for more!
Al

Dr. Hull,

Thanks for the report on my hair analysis. I want to clean out my system once and for all – I am tired of being sick all the time and no answers from the doctors. For days I have had this panic/scared feeling. Now I know what's going on and realize my brain is misfiring due to toxic metals. I now have some hope that this nightmare will end.

Thank you for the only answers anyone has given me.

Eliza
Hampton, NJ

Hello Dr. Hull,

My name is Mike. I was found to be mercury toxic over two years ago. I was chelated and levels were deemed normal through blood and urine tests. I continued to struggle with illnesses and symptoms my doctors are unable to explain ranging from chronic low body temperature to low white blood cell count. I wrote to you because I was frustrated and didn't know what other avenue I could take. After I had the hair analysis done, as you suggested, we discovered that the chelation had not removed all my mercury. You put me on your detox program to remove what the other doctors could not see, and my health has return to where I wanted it. The hair analysis really picks up deep tissue toxins, even after I thought the chelation had removed it all. I feel my life had been on hold for 2+ years. Not any more...

Good work. Thank you very much!

Dear Dr. Hull,

Thanks for sending me your written report and the copy of my hair analysis. It's terrific that you're able to solve health problems that most physicians are unable to identify or understand.

Jim

Dear Jan,

I want to thank you for the hair analysis, which you did on me back in May - June. It was extremely informative, and gave me an excellent baseline for what my body looked like a couple months after I came off years of drinking aspartame in the form of lots of diet sodas. So, thank you for the extremely good job!

Robin

I like the idea of the hair test being done by a nutritionist rather than a dermatologist or a doctor.

Thank you for the time you take,

Jake
Albany, GA

Dear Dr. Hull,

Many thanks for your prompt reply on my hair results. It's indeed very comforting to know that my problem after all is not so bad. I will follow

your recommendations and will certainly let you know how I am doing after that.

Kind regards,
Meg G.

Thank you for responding to my health concerns with such efficiency and for all the work you are doing to help people overcome toxins. We live in such a polluted world these days. How does anyone know what toxins they have inside their bodies without having a hair analysis done? I consider it my lifesaver.

N.G.

Dear Dr. J,

You have saved my life! Even though alternative doctors cannot diagnose, as a result of the hair analysis, you can surely connect the dots for me!! My disease had an underlying cause, and the hair analysis provided the best clues available. Guess that's why they depend on hair testing so much in forensics, eh? Great tool for the living, too.

With deep regards,
Erik

Dear Dr. Hull,

Thank you for your work. You give me such a boost, especially when I need one! These results have the "wheels turning."

K.K.

Hello Janet,

Many thanks for the advice on my dog's hair sample. I want to do everything I can to help extend his life and keep him from suffering. I am relieved that the hair sample we did on him showed the deficiencies he was suffering from. Now, he is self medicating on tons of Barley Greens.

Kind regards.
Jan, UK

Thank you for all the time you spend!

Bob
Denver, CO

I had been searching for very long time for hair analysis, and your site came up often, so I figured you must be good at what you do. I had a lot of skin and hair loss, and the hair analysis was the answer I search for on what nutrition I did not have.

I greatly appreciate your input in directing me towards the proper nutrient needed after such a hair test.

Thank you,
Koh Len, Thailand

Dear Janet!

Thanks for your reply - I was very happy to find your answer in my mailbox. I will certainly do as you suggest and supplement my diet with the essential vitamins you saw I was low in.

I must tell you that here in Poland, I could not find the answers you provided. I will examine closely everything you wrote again and again.

Thanks again for your kindness,

Sincerely yours,
R. Kus

Dear. Dr. Hull,

I am relieved after reading your hair analysis report that you have indeed found the answer to my mysterious health problems. Why would my regular doctor not do the test on the hair?

Pam
Portland, OR
