

Mercury Poisoning

Mercury poisoning often goes undetected for years because the symptoms presented within the body do not necessarily suggest the mercury as the initiating cause.

Mercury poisoning can lead to symptoms such as anxiety, depression, confusion, irritability, insecurity and fatigue. Below is a list of sources where mercury can be found:

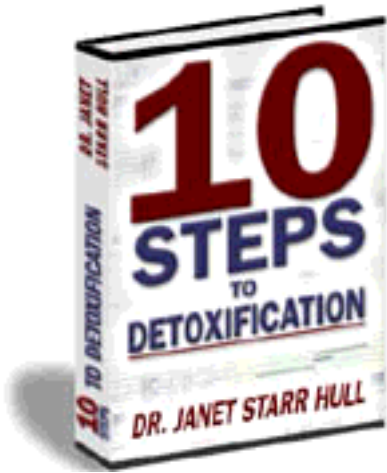

- * Adhesives
- * Air conditioner filters
- * Body powders
- * Broken thermometer
- * Cosmetics
- * Dental fillings
- * Diuretics
- * Fabric softeners
- * Felt floor waxes
- * Polishes
- * Fungicides
- * Industrial wastes
- * Laxatives
- * Mercurochrome
- * Paints
- * Photoengravings
- * Psoriatic ointments
- * Seafood
- * Sewage disposal
- * Skin lightening cream
- * Tanning leather
- * Tattooing
- * Wood preservatives

Mercury Detoxification

Recommended mercury detoxification includes following the process below:

Step One: Get a hair analysis to determine the affects of mercury poisoning on your body.

Step Two: Detox your body of mercury poisoning by following Dr. Hull's Mercury Detoxification Program.

Detox Program by Dr. Janet Starr Hull

The 10 Step Detoxification Program can remove:

- * Radiation
- * Heavy Metals i.e. **mercury poisoning!**
- * Food Chemicals i.e. aspartame
- * Pesticides / Yeast / Mold
- * Microorganisms
- * Alcohol toxicity
- * And more!

Hair Analysis & Mercury Poisoning Case Study

Below is a case study of a 20 year old man who had mercury poisoning sourced to eating canned tuna. His hair analysis identified the cause of his many health symptoms.

"...I was noticing many health symptoms including: irregular sleeping patterns, fatigue, depression, emotional instability, among other side effects. I have been a vegetarian my whole life and have always been extremely healthy...

"With the results that came back from the hair analysis, you helped identify mercury poisoning within my body (from all the canned tuna I had been consistently eating for the past 15 years) and within days, all my health symptoms improved and I feel better than ever."

Thank you so much,
Andy Smith

View Andy's hair analysis and you will see his mercury toxicity levels are off the roof! Click below to view Andy's hair analysis.
